## \$3 Million Settlement Approved Benefiting Hundreds of Alabamians

The Mobile County Circuit Court approved a \$3 million class action settlement negotiated by attorneys from the law firms of Cunningham Bounds, LLC and Holston, Vaughan, and Rosenthal, LLC. The settlement resolves the claims of hundreds of Alabama residents related to contracts they entered with Oasis Legal Finance, LLC.

This class litigation arose from uniform contracts pursuant to which Oasis advanced sums to customers for which it claimed to obtain a "Purchased Interest," which Oasis defined as the right to receive an amount to be determined by formula from the proceeds that customers receive "as a result of [a] legal claim." Oasis explicitly claimed to "own a portion of the potential proceeds from the legal claim[s]" of Class Members, all of whom have or had claims under the Alabama Workers' Compensation Act. Plaintiffs asserted that the Oasis Purchase Agreements were void *ab initio* because they were against public policy as it is stated in the Alabama Workers' Compensation Act, which generally prohibits retaining an interest in the amount to be collected from a workers' compensation claim. Oasis denied the claims.

After a class was certified by the Mobile County Circuit Court in January 2019, the parties entered into a Stipulation of Settlement that has four primary components. First, Oasis must pay the sum of \$2 million into a Settlement Fund out of which class members who already repaid Oasis will receive an allocated share. Second, Oasis was prohibited from accepting any amounts due under Oasis Purchase Agreements from any member of the class who had not yet repaid (this relief was valued at over \$1 million). Third, an injunction entered by the Court prohibits Oasis from accepting any payment from any person pursuant to any Purchase Agreement for which the Legal Claim, as defined in the Purchase Agreement, is an Alabama workers' compensation claim. This injunction shall remain in effect so long as Alabama law prohibits the seizure or garnishment of workers' compensation claims for the payment of any debt or liability. Finally, all attorneys' fees and expenses were paid by Oasis in addition to the \$3 million class recovery, so no class members had to come out of pocket to pay for their representation.

"This was a complex case that was litigated in the Mobile County Circuit Court, the United States District Court for the Southern District of Alabama, the Eleventh Circuit Court of Appeals, and the Alabama Supreme Court. We are proud that our hard work and persistence restored millions of dollars to more than 700 deserving Alabamians," said Lucy Tufts, an attorney with Cunningham Bounds.

Lucy Tufts of Cunningham Bounds, LLC and Ian Rosenthal of Holston, Rosenthal, and Vaughan, LLC were appointed by the Court as Class Counsel.

# Use of Roundup® Linked to Blood Cancers

Roundup® was introduced in 1974 by Monsanto and is now the most popular and widely used herbicide in the world. Monsanto's Roundup® product succeeded and achieved its reputation because it was marketed as a safe way to kill weeds. Due to its popularity, the term "roundup" is now synonymous with any type weed killer or herbicide.

In the past few years, information concerning the chemical formula of Roundup®, and the interaction among chemicals in that formula, has challenged Monsanto's claims of its herbicide's safety. In 2015, the World Health Organization's International Agency for Research on Cancer presented its concerns about the safety of glyphosate, one of the many chemicals in Roundup®, by classifying the chemical as "possibly carcinogenic to humans." Other scientific studies have resulted in similar conclusions.

An increasing amount of scientific data has linked Roundup® exposure to a variety of blood cancers, such as:

- Non-Hodgkin's Lymphoma
- Diffuse Large B Cell Lymphoma
- T Cell Lymphoma
- Small Lymphocytic Lymphoma
- Chronic Lymphocytic Lymphoma
- Acute Lymphoblastic Leukemia
- Hairy Cell Lymphoma
- Mantle Cell Lymphoma
- Multiple Myeloma

These blood cancers are diagnosed more frequently in people who work in industries that use large amounts of Roundup®. These industries include:

- Farming
- Landscaping
- Forestry
- Railroad Vegetation Management
- Utility Right-of-Way Maintenance

Our attorneys are actively pursuing claims against Monsanto for clients that have been diagnosed with a blood cancer following Roundup® exposure. To date, more than 18,000 lawsuits have been filed by victims of Roundup® exposure.

The law firm of Cunningham Bounds, LLC focuses on helping those who have been injured or killed by the wrongdoing of others. Call us for a free consultation regarding your specific situation and to learn about your legal options.
